CENTRAL KYC REGISTRY

CKYC/2019/02   Date : January 01, 2019

To: All entities registered with Central KYC Registry (CKYCR)

Dear Sir / Madam,

Sub: Additional authentication factors for download of KYC record and security framework upgrade

1. Currently, entities need to provide the Date of Birth of the applicant to enable download of the CKYC record. CKYCR will henceforth allow additional authentication factors for download of CKYC records. The authentication factors which would be permitted henceforth are:
    a. Date of Birth
    b. Current/Permanent/Overseas Address PINCODE (only 6 digit numeric values) + Year of Birth
    c. Mobile number (Only 10 digit mobile numbers)

    Changes have been made to the bulk download file version 1.1 and a new API for download (version 1.1) has been provided to facilitate the same.

2. The security framework being used in API has been upgraded in line with best practices. Reporting entities are requested to move to the new API version for search and download at the earliest.

    Search API version 1.1 and Download API version 1.1 have been introduced to facilitate this transition.

    Version 1.0 of Search and Download API will be discontinued with effect from March 31, 2019.

The relevant documents containing details of the changes are listed below for your reference

    a. Revised file structure for bulk download is available [here](#).
    b. Search API version 1.1 document is available [here](#).
    c. Download API version 1.1 document is available [here](#).

For any queries/clarifications please contact the helpdesk.
